Your Essential Guide to Congenitalism and Transitional Care

Presented by the AUA in collaboration with GURS, SPU and SUFU

NEW at AUA2020

This new one day course covers the evaluation and management of the most common problems associated with congenital neuropathic bladder in periadolescent and adult life. Specialty experts will provide a thorough look into topics such as:

- Treating patients with congenital neuropathic bladder stones in both upper and lower tracts
- Physiologically optimize patients with spina bifida in the perioperative period
- Implementing current guidelines for surveillance and treatment of adults with spina bifida
- And more!

Presented by the AUA in partnership with Society of Genitourinary Reconstructive Surgeons (GURS), Societies for Pediatric Urology (SPU) and Society of Urodynamics, Female Pelvic Medicine and Urogynecology (SUFU), this course brings together the unique perspectives and expertise each society brings to this patient population.

Thursday, May 14, 2020 | 1-5 p.m. (one day prior to the AUA Annual Meeting)

Join us starting at 10 a.m. for a non-CME optional session which will focus on articulating specific advocacy needs for CMS/administrative bodies as well as highly important pending legislative issues.

$150 for Member / Non-member | $99 for Residents and Fellows
